

DMP4 PCB Installation Addendum

ELM Video Technology, Inc.
"Innovative Midi and DMX Products"

For the **DPM-RL/Coil**

Do NOT exceed 120VAC or 5 Amps per circuit

Always use the Switch mode, NEVER use the PWM mode when controlling a coil relay

For the **DPM-RL/SSR**

Do NOT exceed 120VAC or 2 Amps per circuit

IF the Switchcraft SC1047 Power Connector is used (optional)

Must be mounted on the bottom of the PCB (no text side of the PCB)

Always use the proper mating power connector - 5.5mm x 2.1mm x 9.5mm connector - center positive

If mounted to the PCB do NOT use a nut on the connector
